Silver Spring, MD 20910

Dear Members of the Department:

I am writing once again to protest the proposal to construction the Millennium Pipeline in Westchester County, specifically in an area that passes very close to a residential area of our Village. The proposed route would have a negative impact on one of our neighborhoods. The residents of that neighborhood have expresses several concern about safety. They have done so in petitions which have been shared with the Village government and with you. Those same residents have expressed concerns about the detrimental impact that the project would have on their property values.

In addition, I wish to voice opposition to a proposed alternative that would pass through Dobbs Ferry even more directly. That alternative would pass near Mercy College, a local high school, a church parking lot and then cross a golf course and several residential areas. I realize that you have not directly proposed this alternative.

Thank you for considering these comments.

Brian Monahan  
Mayor  
Village of Dobbs Ferry
